

SETUP ON TOMCAT

Using Eclipse Dirigible

First Step:

Download ROOT.war for Tomcat

HTTP://DOWNLOAD.DIRIGIBLE.IO

Second Step:

Configure the Users store under
\$CATALINA_HOME/conf/tomcat-users.xml:

```
<tomcat-users>
  <role rolename="Developer"/>
  <role rolename="Operator"/>
  <role rolename="Everyone"/>
<user username="dirigible" password="dirigible" roles="Developer,Operator,Everyone"/>
</tomcat-users>
```

Third Step:

Start the Tomcat server

Fourth Step:

Open a web browser and go to:
<http://localhost:8080/>

Last Step:

A screenshot of a login interface. It has two input fields: 'User Name *' containing 'dirigible' and 'Password *' also containing 'dirigible'. Below the fields is a blue 'Log in' button.
